

WARA DSTAR SEMINAR AUGUST 2007

Below are pictures taken at an information seminar hosted by WARA in Victoria, B.C. Canada. The guest speaker was Eric, VE3EI, from ICOM CANADA. VARPA was represented by attending members Larry VE7DIE, Ed VE7ED, and Paul VE7DHM. The DSTAR project, hosted by WARA in Victoria, is an open project for any and all interested individuals and clubs in the Greater Victoria area.

Here is Al VE7BEU (on left) talking to Larry VE7DIE (blue jacket) and Ed VE7ED. Center background (white T-shirt) is Eric VE3EI setting up ICOM DSTAR ID-1 radios for a hands-on demonstration of high speed data communication. This seminar was very well attended and the interest in this technology was high.

The ICOM DSTAR radio equipment demonstrated by Eric VE3EI was quite extensive. Included was the 2820H, the ID-1, the 91-AD and the ID-800H. Digital voice and digital data modes were explained for both point to point and by using a DSTAR repeater. Other DSTAR equipment shown at this seminar was a DSTAR repeater.
